**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

I live in Andale Kansas. We lived without true high speed internet until a few years ago. We are about 15 miles outside Wichita where Cox and AT&T rule the internet high speed game. However, our city council tried for years to get them to develop in our community only to be told we did not have a big enough population to be worth the investment.

Finally in stepped IdeaTek. They are a small company bringing Fiber optic internet to small communities. They determined our community a good fit for there program. What do you know now Cox wanted to move in. They saw a potential to loose future customers so they forced there way into our neighborhoods despite protests from the community. They wanted their share of a pie they originally didn't want. Typical big business trying to step on the little guy. They would love to crush their competition and be the only one left in our small community. That way they can make prices go through the roof.

Please help keep our internet competition alive and our prices reasonable.

Thank you,
Mike Wescott
